

Assignment 2: Branch Creation and Switching

Create a new branch named 'feature' and switch to it. Make changes in the 'feature' branch and commit them.

Steps:

1.create a new branch

```
HP@DESKTOP-0PVN6A9 MINGW64 /c/.NET 10 week wipro Training/Assignment (master)
$ git branch feature
```

2.Switching to new branch

```
HP@DESKTOP-0PVN6A9 MINGW64 /c/.NET 10 week wipro Training/Assignment (master)
$ git checkout feature
Switched to branch 'feature'
```

3.Make changes in new branch {modifying / creating new file}

```
HP@DESKTOP-0PVN6A9 MINGW64 /c/.NET 10 week wipro Training/Assignment (feature)
$ echo "This is a new Feature" >> example.txt
```

4.Add the changes to staging area

```
HP@DESKTOP-0PVN6A9 MINGW64 /c/.NET 10 week wipro Training/Assignment (feature)
$ git add exmple.txt
```

5.Commit the changes

```
HP@DESKTOP-0PVN6A9 MINGW64 /c/.NET 10 week wipro Training/Assignment (feature)
$ git commit -m "New Feature"
[feature df037b8] New Feature
 2 files changed, 2 insertions(+)
 create mode 100644 example.txt
 create mode 100644 exmple.txt
```
